Don Lessem, author of more than 60 books—most of them about dinosaurs—teams up with Franco Tempesta, a talented illustrator with a fresh and appealing style. The exciting result is an accessible, visually stunning book that's packed with facts that kids can use to impress their friends and families. The *Ultimate Dinopedia* is organized by the periods that are well known to young enthusiasts: Triassic, Jurassic, and Cretaceous. Editorial Review

From [Booklist](#)

The subtitle, *The Most Complete Dinosaur Reference Ever*, sets its sights high, but this impressive, oversize volume lives up to the claim. Lessem has written more than 40 books on dinosaurs, and in the opening chapter here, he presents broad basics on their behavior and habitats as well as a look at major discoveries in paleontology. However, it's the later chapters, which devote two pages each to specific dinosaurs, that will hook hard-core dino lovers. The etymology of each dinosaur name is explained, and each is written phonetically so that readers can share their newly acquired knowledge with perfect pronunciation. Tempesta's full-page illustrations appear on every spread and jump off the page, and the dynamic layout, with fact boxes, captions, and a main text, is immensely appealing. A concluding 40-page "Dino-Dictionary" keys each dinosaur to its family group and provides additional fodder for dinosaur trivia. Books on this topic are certainly nothing new, but Lessem's comprehensive overview will satisfy the interested browser as much as the ardent dinosaur enthusiast. Grades 3-6. --Erin Anderson
