Army of the Nile: The Political Role of the Egyptian Military since 1952 By Kevin E Truitte

In 1952, the Egyptian Military overthrew the British-backed monarchy of the country. The Armed Forces installed itself as a primary actor in Egyptian politics and has since shaped the political development of Egypt. Analyzing the politics of the Egyptian state is impossible without factoring the role of the military, breaking down the historical narrative and the waxing and waning of the military's influence in the government of Egypt, from the 1952 Coup, through the Presidencies of Nasser, Sadat, Mubarak, and the 2011 Egyptian Revolution. The power of the top brass, from top positions in the civilian government, to economic autonomy, to powerful influences in policymaking, reflect the dominance held by those in uniform over the state. After a decline in influence under former President Hosni Mubarak, the 2011 Egyptian Revolution offered an opportunity to reiterate the political importance of the military in the transition to a presidential democracy. As one of the consistent and powerful players in the internal affairs of the country, it is important to study the Egyptian military as it guided Egypt into the modern era.
