Environmental Economics By Barry Field

Environmental Economics is an introduction to the basic principles of environmental economics as they have been developed in the past and as they continue to evolve. The examples discussed in this textbook represent only a sample of the full range of issues that actually exists. For this reason the Seventh Edition sticks to the basic ideas and ways that environmental economists have found to make the basic concepts and models more specific and relevant to concrete environmental issues. The basic structure and sequence of chapters are unchanged but contain new and updated material that reflects the new research efforts by environmental economists over the last few years.

Editorial Review

About the Author

Martha K. Field is Professor of Economics at Greenfield Community College, where she has taught environmental economics for many years. She has taught at the University of Massachusetts, Mount Holyoke College, Westfield State College, Holyoke Community College, and the Consumer Cooperative at Gomel, Belarus. She received a B.S. and M.S. from the University of Massachusetts and holds a Ph.D. from the University of Connecticut.

Barry C. Field is Professor of Resource Economics at the University of Massachusetts in Amherst. Previously he taught at the University of Miami and The George Washington University. He received his B.S. and M.S. degrees from Cornell University, and his Ph.D. from the University of California at Berkeley. At the University of Massachusetts he has devoted many years to teaching natural resource economics to students at all levels, and has worked to develop an undergraduate major in environmental and resource economics. Professor Field is the author of numerous articles on resource and environmental economics.

Users Review

From reader reviews:

Joseph Sutton:

As people who live in the modest era should be update about what going on or information even knowledge to make these keep up with the era that is always change and progress.
