Learning and Memory: From Brain to Behavior By Mark A. Gluck, Eduardo Mercado, Catherine E. Myers

With its modular organization, consistent chapter structure, and contemporary perspective, this groundbreaking survey is ideal for courses on learning and memory, and is easily adaptable to courses that focus on either learning or memory. Instructors can assign the chapters they want from four distinctive modules (introduction, learning, memory, and integrative topics), with each chapter addressing behavioral processes, then the underlying neuroscience, then relevant clinical perspectives. The book is further distinguished by its full-color presentation and coverage that includes comparisons between studies of human and nonhuman brains.

The new edition offers enhanced pedagogy and more coverage of animal learning.

Editorial Review

About the Author

Mark A. Gluck is a Professor of Neuroscience at Rutgers University Newark, co-director of the Memory Disorders Project at Rutgers Newark, and publisher of the project's public health newsletter, *Memory Loss and the Brain*. His research focuses on the neural bases of learning and memory, and the consequences of memory loss due to aging, trauma, and disease. He is co-author of *Gateway to Memory: An Introduction to Neural Network Modeling of the Hippocampus and Learning* (MIT Press, 2001). In 1996, he was awarded an NSF Presidential Early Career Award for Scientists and Engineers by President Bill Clinton. That same year, he received the American Psychological Association (APA) Distinguished Scientific Award for Early Career Contribution to Psychology. **Eduardo Mercado** is an Assistant Professor of Psychology at University at Buffalo, The State University of New York. His research focuses on how different brain systems interact to develop representations of experienced events, and how these representations change over time. Dr. Mercado currently uses techniques from experimental psychology, computational neuroscience, electrical engineering, and behavioral neuroscience to explore questions about auditory learning and memory in rodents, cetaceans, and humans. **Catherine E. Myers** is a Research Scientist with the Department of Veterans Affairs, New Jersey Health Care System, and a Professor in the department of Pharmacology, Physiology, and Neuroscience at the New Jersey Medical School, Rutgers University. Her research includes both computational neuroscience and experimental psychology, and focuses on human learning and memory, especially in clinical disorders such as amnesia and post-traumatic stress disorder (PTSD). She is co-author of *Gateway to Memory: An Introduction to Neural Network Modeling of the Hippocampus and Learning* (MIT Press, 2001) and author of *Delay Learning in Artificial Neural Networks* (Chapman and Hall, 1992)."

Users Review

From reader reviews:

Shawn Macdonald:

Why don't make it to be your habit? Right now, try to prepare your time to do the important action, like looking for your favorite guide and reading a reserve. Beside you can solve your trouble; you can add your knowledge by the e-book entitled Learning and Memory: From Brain to Behavior. Try to make the book Learning and Memory: From Brain to Behavior as your buddy. It means that it can to get your friend when you truly feel alone and beside that of course make you smarter than ever before. Yeah, it is very fortunate for you personally. The book makes you considerably more confidence because you can know everything by the book. So, we should make new experience along with knowledge with this book.

Shannon Bland:

Reading can called mind hangout, why? Because when you find yourself reading a book specially book entitled Learning and Memory: From Brain to Behavior your mind will drift away through every dimension, wandering in each and every aspect that maybe unidentified for but surely might be your mind friends. Imaging each and every word written in a reserve then become one contact form conclusion and explanation that maybe you never get prior to. The Learning and Memory: From Brain to Behavior giving you an additional experience more than blown away the mind but also giving you useful data for your better life in

this particular era. So now let us demonstrate the relaxing pattern this is your body and mind are going to be pleased when you are finished reading it, like winning an activity. Do you want to try this extraordinary wasting spare time activity?

Christine Wormley:

Learning and Memory: From Brain to Behavior can be one of your beginning books that are good idea. All of us recommend that straight away because this e-book has good vocabulary that may increase your knowledge in vocabulary, easy to understand, bit entertaining however delivering the information. The article author giving his/her effort to place every word into delight arrangement in writing Learning and Memory: From Brain to Behavior although doesn't forget the main point, giving the reader the hottest in addition to based confirm resource info that maybe you can be one of it. This great information can certainly drawn you into completely new stage of crucial pondering.

David Moore:

Reading a book make you to get more knowledge from that. You can take knowledge and information originating from a book. Book is composed or printed or created from each source that filled update of news. With this modern era like right now, many ways to get information are available for you actually. From media social such as newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Do you want to spend your spare time to open your book? Or just in search of the Learning and Memory: From Brain to Behavior when you desired it?
