

Chapter 16, Saltation and Stasis

By Noël Cameron

Chapter 16, Saltation and Stasis By Noël Cameron

NOTE: This is a single chapter excerpted from the book *Human Growth and Development*, made available for individual purchase. Additional chapters, as well as the entire book, may be purchased separately.

Offering a study of biological, biomedical and biocultural approaches, the second edition of *Human Growth and Development* is a valued resource for researchers, professors and graduate students across the interdisciplinary area of human development. With timely chapters on obesity, diet / lifestyle, and genetics, this edition is the only publication offering a biological, biomedical and biocultural approach. The second edition of *Human Growth and Development* includes contributions from the well-known experts in the field and is the most reputable, comprehensive resource available.

- New chapters discussing genomics and epigenetics, developmental origins, body proportions and health and the brain and neurological development.
- Presented in the form of lectures to facilitate student programming
- Updated content highlighting the latest research on the relationship between early growth and later (adult) outcomes: the developmental origins of health and disease.
