Computable Bodies: Instrumented Life and the Human Somatic Niche (Bloomsbury Advances in Semiotics) By Josh Berson

Data. Suddenly it is everywhere, and more and more of it is about us. The computing revolution has transformed our understanding of nature. Now it is transforming human behaviour.

For some, pervasive computing offers a powerful vehicle of introspection and self-improvement. For others it signals the arrival of a dangerous 'control society' in which surveillance is no longer the prerogative of discrete institutions but a simple fact of life.

In *Computable Bodies*, anthropologist Josh Berson asks how the data revolution is changing what it means to be human. Drawing on fieldwork in the Quantified Self and polyphasic sleeping communities and integrating perspectives from interaction design, the history and philosophy of science, and medical and linguistic anthropology, he probes a world where everyday life is mediated by a proliferating array of sensor montages, where we adjust our social signals to make them legible to algorithms, and where old rubrics for gauging which features of the world are animate no longer hold.

Computable Bodies offers a vision of an anthropology for an age in which our capacity to generate data and share it over great distances is reconfiguring the body–world interface in ways scarcely imaginable a generation ago.

Editorial Review

Review

What algorithm scans, slices, peels away and reincarnates shapes this groundbreaking work into the cybernetic human carcass. (John R. Stilgoe, Orchard Professor in the History of Landscape Development, Harvard University, USA 2015-05-14)

This dazzlingly original, beautifully written text explores fundamental issues of the body's imbrication with data and instruments. Exploring the variety of ways in which we have rendered ourselves computable, it offers a richly social understanding of selfhood and the body. (Geoffrey C. Bowker, Professor of Informatics, University of California at Irvine, USA 2015-07-01)

Berson brings readers along on a detective-like journey through the contemporary terrain of pervasive computing, probing its effects on the interface between body and world. What, he asks, does a world saturated by human data feel like? Drawing our attention to the uncanny ease with which computing insinuates itself into embodied existence, Berson illuminates the new kinds of entrainment, rhythms, instrumentation, and experiential modulation that result. At once playful and profound, his original admixture of auto-ethnography, critical analysis, and semiotic theorization produces an analysis that is sure to galvanize the current conversation around technology and its intimate effects. (Natasha Dow Schüll, Associate Professor of Science, Technology, and Society, Massachusetts Institute of Technology, USA and author of 'Addiction by Design' and 'Keeping Track' 2015-07-09)

[A] fascinating reflection on what a body is and how we hold and move and feel and are aware of it ... [*Computable Bodies* is] recommended for anyone interested in technology and in what it means to have/be a body. (*Centre for Medical Humanities, Durham University, blog* 2016-07-20)

About the Author

Josh Berson directs the design research studio Assemblage, leads the project Cartographies of Rest at Hubbub Group, London, UK, and is visiting researcher at the Max Planck Institute for Human Cognitive and Brain Sciences, Leipzig, Germany

Users Review

From reader reviews:

Judy Young:

The book *Computable Bodies: Instrumented Life and the Human Somatic Niche* (Bloomsbury Advances in Semiotics) make you feel enjoy for your spare time. You need to use to make your capable much more increase. Book can to become your best friend when you getting anxiety or having big problem with your subject. If you can make examining a book *Computable Bodies: Instrumented Life and the Human Somatic Niche* (Bloomsbury Advances in Semiotics) being your habit, you can get much more advantages, like add your current capable, increase your knowledge about some or all subjects. It is possible to know everything if you like start and read a book *Computable Bodies: Instrumented Life and the Human Somatic Niche* (Bloomsbury Advances in Semiotics). Kinds of book are several. It means that, science book or encyclopedia or others. So , how do you think about this book?

Stephen Thrush:

Spent a free time to be fun activity to try and do! A lot of people spent their free time with their family, or their very own friends. Usually they accomplishing activity like watching television, planning to beach, or picnic from the park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your free time/ holiday? Might be reading a book could be option to fill your cost-free time/ holiday. The first thing you will ask may be what kinds of reserve that you should read. If you want to consider look for book, may be the book untitled *Computable Bodies: Instrumented Life and the Human Somatic Niche* (Bloomsbury Advances in Semiotics) can be very good book to read. May be it might be best activity to you.

Louise Villanueva:

This *Computable Bodies: Instrumented Life and the Human Somatic Niche* (Bloomsbury Advances in Semiotics) is great publication for you because the content which can be full of information for you who also always deal with world and still have to make decision every minute. That book reveal it facts accurately using great plan word or we can claim no rambling sentences inside. So if you are read that hurriedly you can have whole information in it. Doesn't mean it only provides straight forward sentences but tricky core information with splendid delivering sentences. Having *Computable Bodies: Instrumented Life and the Human Somatic Niche* (Bloomsbury Advances in Semiotics) in your hand like getting the world in your arm, info in it is not ridiculous just one. We can say that no e-book that offer you world with ten or fifteen tiny right but this publication already do that. So , this is good reading book. Heya Mr. and Mrs. hectic do you still doubt which?

Esther Tackett:

As a pupil exactly feel bored in order to reading. If their teacher requested them to go to the library as well as to make summary for some e-book, they are complained. Just minor students that has reading's internal or real their leisure activity. They just do what the teacher want, like asked to go to the library. They go to at this time there but nothing reading very seriously. Any students feel that reading through is not important, boring and can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this period, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this *Computable Bodies: Instrumented Life and the Human Somatic Niche* (Bloomsbury Advances in Semiotics) can make you experience more interested to read.
