Silk: Processing, Properties and Applications (Woodhead Publishing Series in Textiles) By K. Murugesh Babu

Silk is a natural, environmentally-friendly fibre with a remarkable range of properties, making it ideal for use in apparel and many other applications. *Silk: Processing, properties and applications* provides an authoritative reference on sericulture, silk fabric processing, silk properties and its applications.

The book begins by looking at key aspects of sericulture, including the range of mulberry and non-mulberry species of silk worm, early and late stage rearing and harvesting of cocoons. Further chapters discuss reeling, weaving and spinning techniques as well as dyeing. The book also discusses the physical and chemical structure of silk as well as its mechanical and thermal properties. Concluding chapters discuss developments in applications and the properties of spider silk.

Silk: Processing, properties and applications is useful for textile technologists, fibre scientists and all those with an interest in the characteristics of silk, its production and the varied uses of this important fibre.

- Provides an in-depth summary of silk production, properties and structure-property relationships
- Examines the future of silk, including its application in the textile, biomedical, pharmaceutical and cosmetic industries
- Provides an authoritative reference on sericulture, silk fabric processing, silk properties and its applications

Editorial Review

About the Author

K. Murugesh Babu is Professor and Head of the Department of Textile Technology, and Dean (Public & International Affairs), at the Bapuji Institute of Engineering and Technology (BIET), Davangere, Karnataka, India. He completed his postgraduate degree in textile technology at Anna University, Chennai, India, before obtaining his Ph.D. from the Indian Institute of Technology Delhi in 2001. Dr. Babu has been involved in several international assignments. In 2006, he was invited to the University of Oxford in the UK, to join a 1-year research project on silk based biomaterials. From 2007 to 2008, Dr. Babu was involved in advanced research on shape memory textiles and garments, at the Institute of Textiles and Clothing, Hong Kong Polytechnic University, Hong Kong. In 2014, Dr. Babu was awarded with the prestigious Commonwealth Fellowship by the Association of Commonwealth Universities, based in the UK. Under this fellowship, he was invited to become a Visiting Professor at the University of Maroua, Cameroon, Central Africa, in order to establish and develop the Department of Textiles. As well as writing the first edition of this book, Dr. Babu has published approximately 80 research papers, contributed 7 book chapters, and is recognized as a Technical Referee for 10 international textile/polymer journals. His main research areas include silk based biomaterials, natural fibre based eco-biocomposites, eco-friendly processing, organic cotton processing and eco-management concepts, natural anti-microbial agent based finishing of cotton and other fibres, and bamboo-blended fabric production and characterization.

Users Review

From reader reviews:

Luisa Johnson:

The book Silk: Processing, Properties and Applications (Woodhead Publishing Series in Textiles) can give more knowledge and information about everything you want. Why then must we leave a very important thing like a book Silk: Processing, Properties and Applications (Woodhead Publishing Series in Textiles)? Wide variety you have a different opinion about guide. But one aim that book can give many data for us. It is absolutely appropriate. Right now, try to closer using your book. Knowledge or data that you take for that, you are able to give for each other; you could share all of these. Book Silk: Processing, Properties and Applications (Woodhead Publishing Series in Textiles) has simple shape but you know: it has great and big function for you. You can appearance the enormous world by open and read a e-book. So it is very wonderful.

Mary Gillon:

Information is provisions for individuals to get better life, information presently can get by anyone at everywhere. The information can be a know-how or any news even restricted. What people must be consider when those information which is from the former life are challenging be find than now could be taking seriously which one would work to believe or which one the actual resource are convinced. If you receive the unstable resource then you obtain it as your main information we will see huge disadvantage for you. All of those possibilities will not happen with you if you take Silk: Processing, Properties and Applications (Woodhead Publishing Series in Textiles) as your daily resource information.

Patti Metivier:

Reading a book being new life style in this calendar year; every people loves to read a book. When you learn a book you can get a large amount of benefit. When you read books, you can improve your knowledge, since book has a lot of information into it. The information that you will get depend on what forms of book that you have read.
