

3D Printing: The Next Technology Gold Rush - Future Factories and How to Capitalize on Distributed Manufacturing

By Christopher D. Winnan

3D Printing: The Next Technology Gold Rush - Future Factories and How to Capitalize on Distributed Manufacturing By Christopher D. Winnan

This book concentrates on three main areas.

1. Easy to read, yet detailed explanations of all the 3D printing related technologies currently available

2. Practical advice on how this technology can be leveraged as a successful business in today's economy.

3. The wider long-term repercussions, including real world examples of how 3D printing is set to change the future of industry.

Part 1 of this book presents the various 3D printing systems currently on the market, covering their background, their functionality and their relative pros and cons. Separate chapters offer similarly in-depth examinations of the very latest scanning technologies, 3D modelling software and 3D file archives. Complex technical processes are explained in detail, but using language accessible to readers who are new to this fascinating subject.

Part 2 focuses specifically on areas in which a 3D printer can be used to generate income. It examines a wide range of niche markets presenting real world examples and current success stories. In addition, it identifies and explores many unfilled niches that are still wide open. The author talks extensively about his own projects and analyses large amounts of very well researched information that is unavailable elsewhere.

Part 3 looks at the bigger picture. Individual chapters concentrate upon emerging materials, how the industry is scaling up production, and where the battle lines are being drawn amongst the complex legal issues. Readers are introduced to the highly disruptive nature of distributed manufacturing, demonstrating many of the global impacts and developments that will transform entire economies in the next ten years.

Far from being a dry technical manual, this book addresses three key issues that are important to anybody interested in this rapidly evolving field. What are 3D

printers all about? How can they be used to make money? What does the immediate future hold for this amazing technology? Humorous, insightful and inspiring in equal measure.

Editorial Review

About the Author

Christopher Winnan has many interests with expertise in a variety of fields. For the last two decades he has been based in the newest incubator of great ideas: Asia. As a consultant, he travels widely throughout Asia working in Thailand, Korea and the emerging powerhouse China. Seeking out the latest breakthroughs in a wide range of emerging technologies, he visits research facilities, trade shows and suppliers throughout China to analyze and evaluate the latest developments. He turns facts into information, and information into valuable knowledge. His uncanny ability to pick and forecast trends leave him in demand as an advisor to European and North American companies and investors. As a writer, he has established his expertise by contributing to Frommers and National Geographic. When not consulting or publishing, he can be found exploring Asia's newest frontiers: from the Tibetan borderland ancient tea-horse routes to the fantastic karst landscapes of south China's opium trails.

Users Review

From reader reviews:

Eleanor Williams:

In other case, little persons like to read book 3D Printing: The Next Technology Gold Rush - Future Factories and How to Capitalize on Distributed Manufacturing. You can choose the best book if you appreciate reading a book. Given that we know about how is important any book 3D Printing: The Next Technology Gold Rush - Future Factories and How to Capitalize on Distributed Manufacturing. You can add understanding and of course you can around the world by a book. Absolutely right, simply because from book you can realize everything! From your country until foreign or abroad you can be known. About simple issue until wonderful thing you could know that. In this era, we are able to open a book or searching by internet gadget. It is called e-book. You may use it when you feel uninterested to go to the library. Let's read.

John Valdez:

Book is written, printed, or created for everything. You can understand everything you want by a reserve. Book has a different type. As you may know that book is important point to bring us around the world. Alongside that you can your reading ability was fluently. A publication 3D Printing: The Next Technology Gold Rush - Future Factories and How to Capitalize on Distributed Manufacturing will make you to end up being smarter. You can feel a lot more confidence if you can know about everything. But some of you think that open or reading some sort of book make you bored. It isn't make you fun. Why they are often thought like that? Have you searching for best book or acceptable book with you?

Eddie Drennan:

People live in this new day of lifestyle always try to and must have the time or they will get wide range of stress from both day to day life and work. So , when we ask do people have extra time, we will say

absolutely sure. People is human not a robot. Then we request again, what kind of activity do you possess when the spare time coming to anyone of course your answer can unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative throughout spending your spare time, typically the book you have read will be 3D Printing: The Next Technology Gold Rush - Future Factories and How to Capitalize on Distributed Manufacturing.

Jonathan Solis:

Within this era which is the greater person or who has ability to do something more are more valuable than other. Do you want to become considered one of it? It is just simple method to have that. What you have to do is just spending your time almost no but quite enough to get a look at some books. On the list of books in the top list in your reading list is definitely 3D Printing: The Next Technology Gold Rush - Future Factories and How to Capitalize on Distributed Manufacturing. This book that is certainly qualified as The Hungry Hills can get you closer in getting precious person. By looking up and review this reserve you can get many advantages.
