Practical Statistics for Educators, 4th Edition By Ruth Ravid professor emerita National Louis University

Practical Statistics for Educators, 4th edition focuses on the application of research and statistics as applied specifically to education. Since the first edition came out in 1994, thousands of students in educational statistics courses and their professors have found it to be an excellent textbook. Educational practitioners have also appreciated keeping this book on their reference shelf. Now in its fourth edition, this well-regarded text is a clear and easy-to-follow manual for use in introductory statistics or action research courses. Ruth Ravid concentrates on the essential concepts in educational statistics including when to use various statistical tests and how to interpret the results. Testing and test score interpretation, reliability, and validity are included to help students understand these topics which are essential for practitioners in education. Examples from the field of education are used throughout the book to illustrate the concepts, techniques, and interpretations that are presented in the book.

Editorial Review

Review

Practical Statistics For Educators is a thoughtfully designed text that enables educators to easily understand and apply statistics and research in the field of education. I like the author's style of writing, flow of information and the way she makes the application of statistics user-friendly! The book reduces course anxiety for anyone who may have a fear of statistics and provides users with a comfort level not found in many of other texts of its kind. (Linda A. Catelli, director of the PDS Partnerships)

This book is one of the very best on the topic of statistics designed specifically for educators, offering a no nonsense, straight forward approach with specific examples in the field of education. My students find this book easy to read and tremendously helpful as they complete their own research. I continually recommend it to others. (Michelle Ann Bakerson, Indiana University South Bend)

An excellent resource for students and educators learning the application of educational research and statistics. I highly recommend it. (Daniel R. Tomal, Concordia University Chicago; author of Action Research for Educators)

Concise but thorough treatment of elementary principles. I will use the text for a 2-course research method sequence for masters candidate. (Philip A. Griswold, University of Maine at Farmington)

Great text with very clear exercises and relevant examples. Very useful in connecting theory with practice. (Jan Seiter, Texas A&M - Central Texas)

About the Author

Ruth Ravid is professor of education at National College of Education, National-Louis University, Illinois. She is the inaugural recipient of the AERA School-University Collaborative Research Service Award, 2010, and holds an M.A. and a Ph.D. in education from Northwestern University.

Users Review

From reader reviews:

Alfred Wolff:
