**What Your Atheist Professor Doesn't Know (But Should) (Volume 1)** By Stephen Joseph Williams

The information age has begotten turmoil. It seems that the more information we have, the less peace the average person has. To many, an impression has developed that modern science has disproved the existence of the immaterial realm, and doomed us to a sterile, pointless wandering in the wilderness of minutiae. During roughly the same time this impression has been developing in popular culture, however, massive evidence to the contrary has been steadily erupting from The Sciences! Now that literally billions of trillions of layers of mathematical impossibility have been exposed for the Materialist worldview, compounded by insurmountable metaphysical hurdles, atheism has been shown to be completely irrational! A reasonably skeptical look at modern philosophy, science, archaeology and history point overwhelmingly in a single direction, and the truth that it points to is blissful and eternal. If you'd like to see some of the evidence that has been causing a resurgence of Theism in academic philosophy departments recently, read this book!

## **Editorial Review**

### Review

Wow! A fascinating compilation of well-researched evidence here builds the case for life's incredibly precise design, along with the extreme improbability that it happened by chance.

*Nancy Chappell, Instructor, Kumon Math and Reading Center of Springfield*

There are many books out there that tackle intelligent design. Most of them tend to be tomes that swamp you with information. What makes this clever book unique is the fact that it makes a great argument for intelligent design based on the words, research, and conclusions of secular mathematicians, physicists, biologists, and historians ...(skeptics)... and does so in just over 100 pages. There was one chapter that spent a few paragraphs talking about a concept called "irreducible complexity"...

(continued)...This topic was explained in a brilliant and easily understandable manner, and the implications were so stunning that afterwards I laid in bed for hours trying to sleep while my mind raced thinking about it. All sources were clearly referenced, and the sources listed will provide even more reading for me in the future. I have been an avid reader my whole life, and I can say that this is the first book that I have ever finished and immediately started over again at page one. I highly recommend it.

*Jeffrey Lyons, Electronics Technician*

Books can be helpful in several ways, one to edify and equip the the reader, and another is to be used as a referral to those seeking for answers, a springboard for further conversations. I have found that this book does both. It affirmed and confirmed many of my previous understandings , but it has also helped me in sharing these insights and not having to do the work again and again...

(continued)...Steve's exhaustive bibliography in each chapter really brings things out of hearsay, but plainly states what they did say. I recommend this book to any who are looking for a logical, Biblically based look at our Universe.

*Pastor David "Waxer" Tipton, PhD*

### From the Author

I promise that you will enjoy this book, and will learn from it if you give it a chance. Yes, there are some big words, but they are beautiful, rich words, and they are worth learning. For what it's worth, a friend of mine said he dug reading it on Kindle, because he could simply tap on any word to get a definition.

"Why don't you have a post-graduate degree, Steve?", some ask. The reason is that I live in Hawaii, where there is quite a leftist bent in higher education. I learned this the hard way while earning my BA in English Literature at U.H. Manoa. When I would challenge the atheist/postmodernist assumptions of some of my professors, they couldn't provide an adequate response, but they dinged my grades. Friends who go to other universities here confirmed that it's the same at those institutions as well. So I made up my mind to do self-directed study, and I've gone way beyond where many PhD's have gone. My conversations with top-shelf thinkers like William Lane Craig have confirmed that I have self-educated my self soundly. No brag; just fact. It needs to be said, because some people perceive a void after my name where they expect a few letters to be.

### About the Author

Steve Williams, is head of the Reasonable Faith Honolulu chapter and author of "What Your Atheist Professor Doesn't Know (But Should)" [<http://www.amazon.com/Atheist-Professor-Doesnt-Should-ebook/dp/B0084Y3Q14>] and "The Skeptics' Guide to Eternal Bliss" (Lulu.com; 2009) [<http://www.lulu.com/shop/steve-j-williams/sgeb-2nd-edition/paperback/product-5295443.html>]. Steve also writes on church-state issues for Examiner.com, is married, and is currently raising two kids in Honolulu. A Moorpark College and U.H. Manoa graduate, Steve was a licensed real estate agent from 1996 to 2010, and was an Elder and Prayer Deacon at a local church for several years. He is also an avid guitarist, and has written numerous articles for local newspapers and websites. Steve is a voracious reader, with interests in Philosophy, Theology and American Law, and his Theological writings have been used to teach at Oceania Theological Seminary. Steve has an IQ in the genius range (no brag; just relevant fact, especially for an autodidact). Steve's interactions with top-shelf thinkers like William Lane Craig, and Fazale Rana have confirmed that his reasoning on these topics is sound.

## **Users Review**

### **From reader reviews:**

#### **Deborah Browning:**

Your reading sixth sense will not betray you actually, why because this What Your Atheist Professor Doesn't Know (But Should) (Volume 1) reserve written by well-known writer who really knows well how to make book which might be understand by anyone who all read the book.
