Android Internals::Power User's View By Jonathan Levin

Android Internals::A Confectioner's Cookbook is the first time the inner workings of the world's most popular operating system have been documented! Without going into the lengthy code, it presents the logic and flow of Android's various components using detailed illustrations, verbose annotations and hands-on experiments! Volume I takes the power user's point of view - the utilities and functionality accessible through adb shell. In particular, we explore: Partitions and Filesystems The Boot Process Init and its configuration files The native daemons in /system/bin The framework service architecture and servicemanager, Monitoring through Linux interfaces, and of course Security. All versions of Android - up to and including the upcoming Nougat - are covered, with examples taken from the wide gamut of Android Devices - Nexi, Samsung Galaxy S series, NVidia Shield, Amazon Kindle, HTC One M9, and the Android Emulator. This is the first in a multi-volume series, aiming to explore Android down to its last class. Stay tuned for Volume II - The Programmer's View - which picks up where the Power User's View ends, and dives deeper still into the frameworks, input, audio, video and network architecture... wading through the inevitable quagmire of code.

Editorial Review

Users Review

From reader reviews:

Agustin Thornsberry:

Have you spare time for a day? What do you do when you have far more or little spare time? Sure, you can choose the suitable activity to get spend your time. Any person spent their particular spare time to take a stroll, shopping, or went to the Mall. How about open as well as read a book called Android Internals::Power User's View? Maybe it is for being best activity for you. You understand beside you can spend your time with the favorite's book, you can wiser than before. Do you agree with it has the opinion or you have other opinion?

Catherine Browning:

Reading a e-book tends to be new life style on this era globalization. With reading through you can get a lot of information that could give you benefit in your life. Using book everyone in this world could share their idea. Books can also inspire a lot of people. A lot of author can inspire their reader with their story or even their experience. Not only the story that share in the guides. But also they write about the knowledge about something that you need illustration. How to get the good score toefl, or how to teach your kids, there are many kinds of book that you can get now. The authors these days always try to improve their proficiency in writing, they also doing some exploration before they write to the book. One of them is this Android Internals::Power User's View.

Michelle Seidl:

That reserve can make you to feel relax. This book Android Internals::Power User's View was multi-colored and of course has pictures around. As we know that book Android Internals::Power User's View has many kinds or style. Start from kids until teenagers. For example Naruto or Investigation company Conan you can read and believe you are the character on there. Therefore not at all of book are usually make you bored, any it offers you feel happy, fun and relax. Try to choose the best book for yourself and try to like reading that.

Wanda Sousa:

As a pupil exactly feel bored to help reading. If their teacher expected them to go to the library in order to make summary for some publication, they are complained. Just very little students that has reading's internal or real their pastime. They just do what the instructor want, like asked to go to the library. They go to at this time there but nothing reading seriously. Any students feel that looking at is not important, boring and also can't see colorful pics on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this age, many ways to get whatever we want. Likewise word says, ways to reach Chinese's

country. So , this Android Internals::Power User's View can make you sense more interested to read.
